

Theme 1: Profile & Onboarding

US1.1 As a student, I want to create an account using my full name, email address and password so that I can access the Scout platform securely.

US1.2 As a student, I want to verify my email address using two-factor authentication so that my account is secure, and my profile can be trusted by the platform.

US1.3 As a student, I want to reset my password if I forget it so that I can regain access to my account without losing my profile data.

US1.4 As a student, I want to build a structured profile capturing my personal information, academic record and opportunity preferences so that Scout has everything it needs to match and apply on my behalf.

US1.5 As a student, I want to upload my matric certificate, academic transcript and proof of registration once so that these documents are stored and automatically used across all future applications without me reattaching them.

US1.6 As a student, I want to update my profile information and uploaded documents at any time, and control which personal details are shared with opportunity providers, so that Scout always applies using my most current and accurate details while protecting sensitive information.

Theme 2: Eligibility Matching & Assisted Application

US2.1 As a student, I want Scout to automatically compare my profile against live opportunity listings so that I am only shown internships, learnerships and graduate programmes that I am eligible for.

US2.2 As a student, I want my matched opportunities to be displayed ordered by closing date so that I can prioritise the most urgent applications without missing deadlines.

US2.3 As a student, I want to bookmark an opportunity so that I can save it and return to apply at a later stage without losing track of it.

US2.4 As a student, I want to click the auto-apply button on a matched opportunity so that Scout autofills the application form using my stored profile details and automatically attaches my relevant documents, while allowing me to review and edit before submission to ensure accuracy and relevance.

US2.5 As a student, I want to be notified via email if a required document is missing from my profile when I initiate an application, and once I upload the missing document, have Scout automatically resume and present a review screen before submitting so that I do not lose application progress.

US2.6 As a student, I want to receive a submission report containing my application details and a unique reference number after a successful application so that I have documented proof that my application was submitted.

Theme 3: Application Tracking & Notifications

US3.1 As a student, I want to view all my submitted applications in a centralised dashboard so that I do not have to log into multiple provider portals to check the status of my applications.

US3.2 As a student, I want to see the status of each application displayed as Submitted, Reviewing or Outcome Received so that I always know exactly where each application stands in the process.

US3.3 As a student, I want my dashboard to update automatically when a provider responds or changes the status of my application so that I receive the most current information without having to manually refresh or follow up.

US3.4 As a student, I want to view all my bookmarked opportunities in one place on my dashboard so that I can easily track the listings I am interested in and manage my pending applications.

US3.5 As a student, I want to receive an automated reminder 3 days before a bookmarked opportunity's closing date so that I am alerted in time to apply before the deadline passes.

US3.6 As a student, I want to be notified on my dashboard and via email when a provider updates the outcome of my application so that I am informed of results as soon as they are available without having to check manually.

US3.7 As a student managing multiple applications, I want to download a summary report of all my applications including their statuses and reference numbers so that I have an organised offline record of my submissions.
